

## New Key Programming Software Mercedes® ADS2298

August 2021

Advanced Diagnostics is pleased to announce the release of the ADS2298 key programming software compatible with Mercedes® models produced from 1996 to 2014.

### What does the software do?

The software is designed to program slot keys compatible with Mercedes® models. The software is automatically activated when the Smart Programmer ADC260, required for programming these keys, is connected to the Smart Pro.

A maximum of 8 keys can be programmed with this solution - you don't have to delete existing keys to add new ones. The security password is calculated in the background by the server - the Smart Pro must be connected to the internet. The 4-button slot key by Ilco POD-BENZ-4B1 is required for this software and offer the same infrared technology used by original keys. This software does not use tokens. It is a free software with the purchase of the ADC260 Mercedes Smart Programmer device. Support for all keys lost situations is coming soon.

### What else will I need?

Smart Pro

ADC260

POD-BENZ-4B1

### OFFER DETAILS

Cable	ADC2000
Smart Aerial required	No
Software category	Free with Purchase of ADC260
Other accessories required	ADC260
